

LUXURY

TECElux

toilet terminal – It's all on the inside rather than on the outside.

With its simple aesthetics, TECElux blends in with the architecture of any bathroom.

The terminal's extremely flat glass facing covers the inspection opening and conceals the cistern, connections for water, power and odour trap.

A TECElux module

Glass cover orange

9 240 674
Glass cover black, Alape and Emco

The buttons and glass covers can be freely combined with each other. This produces a total of 104 different possible combinations. The highlight: Some of the glass covers are colour coordinated with the products from Alape (see ruby red glass cover, Alape) Emco and Burgbad. So the bathroom planner always has the right toilet push plate at hand.

Every TECE toilet push plate fits to every TECE Cistern.

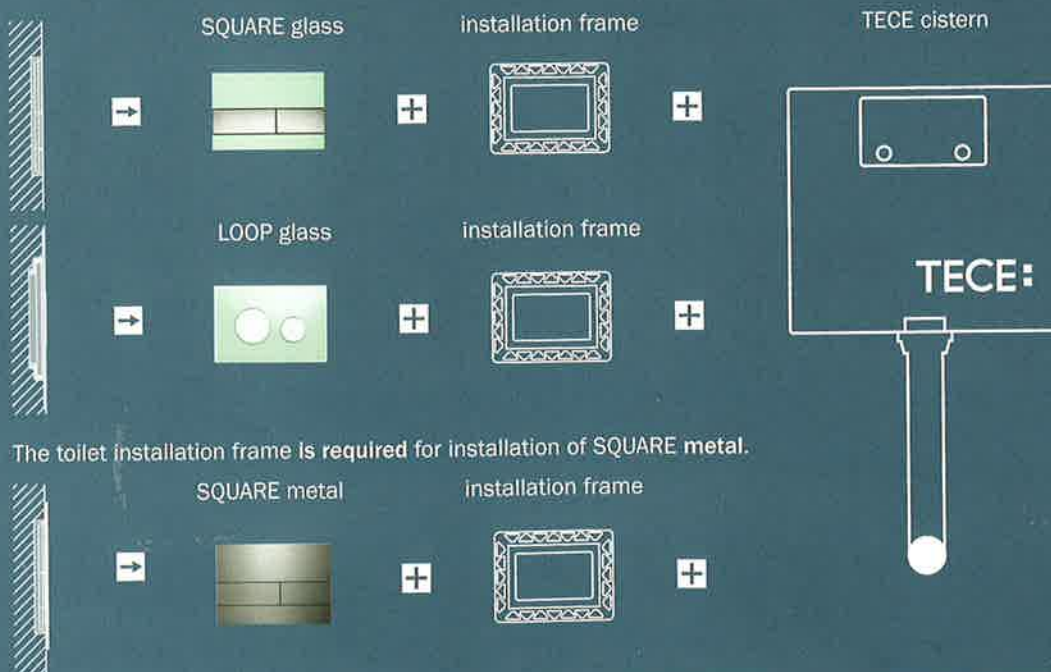

The right frame for flush-mounted installation.

Flush-mounted installation of **SQUARE** and **LOOP** glass

The push plates can be integrated fully flush to the wall.

Specialists can carry out installation with the optionally available installation frame.

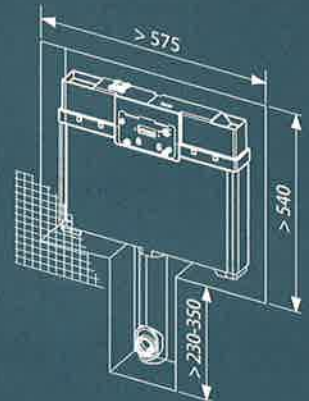

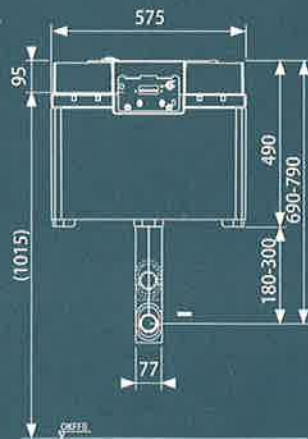

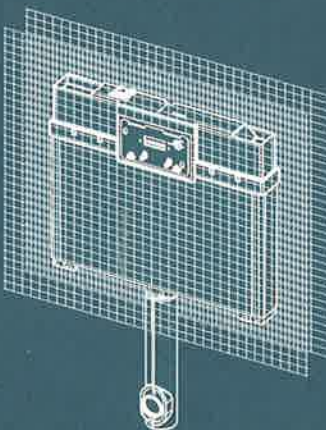

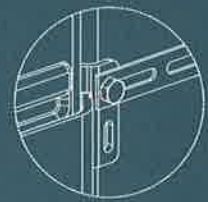

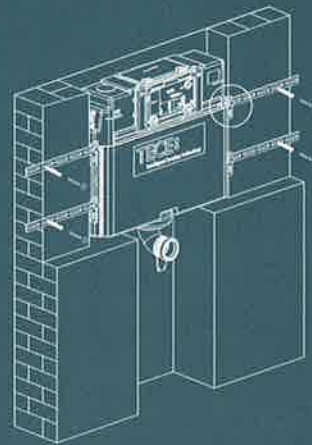

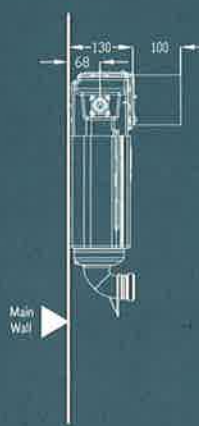

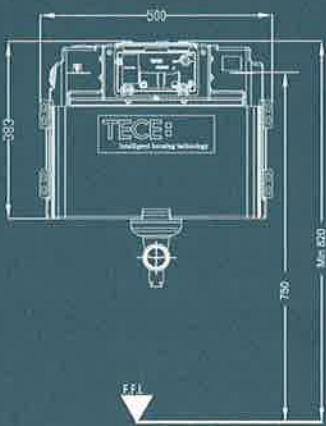

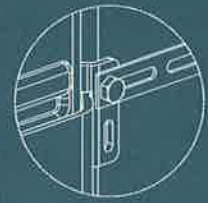

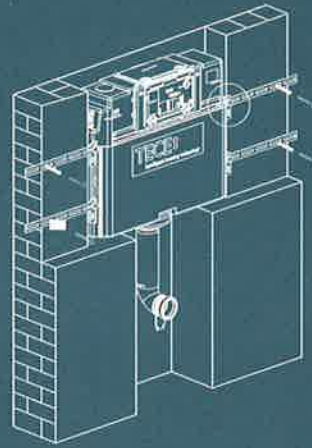

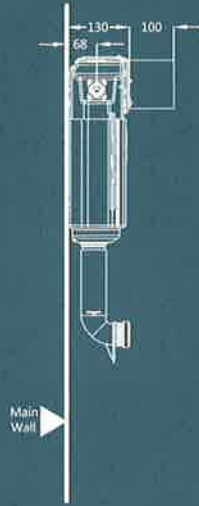

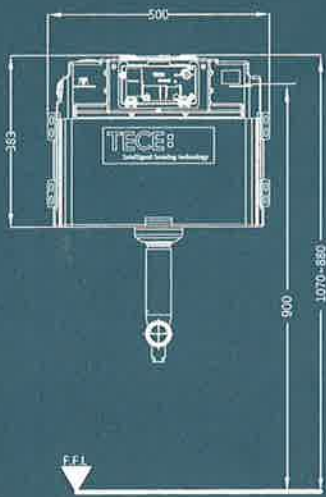

The toilet installation frame is required for installation of **SQUARE** metal.

Toilet installation frame

Depth-adjustable for wall coverings from 5 to 18 mm (up to 36 mm with upgrade set). The different frame colours allow individual modification in line with the cover or wall.

TECE Cistern - with a sustainability guarantee

Save 25 percent water!

Thanks to the combination of dual-flush technology and a genuine 4 litre flush.

The TECE cistern with the award-winning valve now makes a real economy flush possible with dual-flush technology. With simple adjustment, the fitter can choose between 4 to 9 litres for the full flush, while the reduced flush remains a constant 3 litres. This flexibility, in particular, means sustainability for TECE.
