Mandatory Water Efficiency Labelling Scheme (MWELS)

MWELS compliant basin mixers with 1/2" connection nuts

For the more popular series of Hansgrohe and Axor basin mixers, they are now available with distinct - 009 article numbers, versions that are compliant to PUB MWELS 1-tick specification. This version is also delivered with hexagon connection nuts that are more installation friendly. This not only saves time but also costs as it makes installation of the fittings easier. It also contributes towards the BCA Greenmark, which is a green building rating system to evaluate a building for its environmental impact and performance.

Depending on the product, customized versions that comply to PUB 2-ticks or 3-ticks specification may be available on request.
