To suit every requirement

ComfortZone for Metropol Classic

Whether you need more room for washing your hands, washing your hair, or filling containers, the higher the mixer, the more flexibility there is in the daily use of water. We call this area between the mixer and the

ceramic the ComfortZone. The Metropol Classic mixer line comes in three available heights (110, 160 and 260). For more comfort. For more space. For every day.

More technology and comfort for you and your customers

Engineered in Germany

Hansgrohe offers you quality that you can pass on directly to your customers. This assures your long-term satisfaction. Our in-house research and development departments are constantly innovating. Premium materials and a comprehensive suite of tests guarantee product durability. German know-how for products with benchmark-setting functionality and comfort – that is our claim.

EcoSmart/AirPower EcoSmart reduces the flow rate, saving both water and energy. AirPower enriches the flowing water with air to create a gentler, lighter, ampler jet of water.

Advantages

- Water consumption only 5 l/min, saving water and helping to comply with building certifications such as LEED
- Precision O ring for a constant flow even under fluctuating water pressures
- Lush, effervescent jet of water enriched with air to ensure less spraying

QuickClean makes it possible to simply wipe away lime scale deposits by rubbing a finger gently over the flexible silicone jets.

Advantages

- Fast and easy cleaning
- Long lifetime and functionality
